

# No-cost weatherization services for limited income households

Pacific Power partners with local agencies to provide free weatherization services to income-qualifying homeowners and renters living in single-family homes, mobile homes or apartments. Based on the home's needs, a variety of measures can be installed, including insulation, energy-efficient showerheads, LED light bulbs and more. All of these measures are designed to lower your electric bills while keeping your home comfortable.

Please call the community agency in your area to learn more and to apply:
